

## *GUS* says—

- 1.** Always take your foot off the accelerator while you are shifting from first to second or from second to third speeds.
- 2.** Keep your foot on the accelerator when you shift to a lower gear on a hill.
- 3.** Avoid speeding up the car in first—shift to second before the car has gone more than 10 feet.
- 4.** After shifting from first to second or from second to third, be sure that you do not press the accelerator again until the clutch is fully engaged.
- 5.** Never try to shift into reverse gear when the car is traveling forward. Wait till it stops completely.
- 6.** Make sure that the transmission case is filled to the proper level with exactly the kind of lubricant specified by the maker of the car.
