

IT TAKES GOOD LIGHT AND TED TINKER

*to make a
crown like this*

● "I have never done a job where good lighting was so imperative," says Ted Tinker, famous advertising designer, "as on this 4-inch-high Coronation Crown. It was done in sterling silver, gold plated, with several hundred *real* gems!"

The Tinker workshop, where this Crown and many other display masterpieces were made, is lighted with five 150-watt G-E MAZDA lamps, costing only 20c apiece.

NEW G-E MAZDA Reflector Lamp . . . a 150-watt bulb and reflector in one sealed unit! Perfect for downlight on difficult workshop jobs. Sells for only \$1.10.

MIRROR ON
DOOR JAMB

Mirror Near Garage Door Checks on Tail Lights

A QUICK and easy way to make sure that the tail and stop lights on your car are working properly before you leave your garage, is shown in the illustration above. Fasten a small mirror on the garage wall near the door, or on the door jamb, in a position so that it will reflect the rear fender lights into your eyes as you look around to back out. Some day, this may save you a bout with the law over an unlit tail light.—K.W.W.

YELLOW
OILED-SILK
DISH COVER

Refrigerator Dish Covers Fix Headlamps for Fog

FOG LAMPS are handy accessories to have on your car for lighting your way through spring mists. I couldn't afford them, but I found that an efficient substitute can be made from oiled-silk dish covers of the type sold for use in refrigerators. These come in a yellow color, with an elastic around the rim, making it a simple matter to slip one over each headlamp lens. They can be conveniently carried in a pocket of the car and slipped on at a moment's notice whenever you run into fog. I have found that they work well.—J.M.
